WHEREAS, Customer is in possession of the JAVS recording system(s) more particularly identified in Attachment A "System(s)";

WHEREAS, JAVS will provide the following maintenance, repair, and support services so as to maximize the reliability of Customer's System(s) "Services";

NOW, THEREFORE, in consideration of the promises and mutual covenants contained herein, the parties hereby agree as follows:

A. SERVICES

1. Tri-Annual Inspections. JAVS will perform a tri-annual inspection, review of the operational test recordings and adjustments of each System for the JAVS built PCs/recorders, AutoLog software and equipment if scheduled time to access the room and equipment is provided by Customer during regular business hours. JAVS will provide user recommendations to Customer and a maintenance form detailing the status of each System which includes key system information and hard drive capacity of the JAVS built PCs/recorders.
2. JAVS Provided Equipment. JAVS will document and test each function/mode of the entire System(s) which includes the automatic audio and video mixer/switcher, control boxes, microphones, cameras, time and date generator, monitors, streaming servers, recorders, PA processors and speakers, private mode feed muting, playback/presentation, assisted listening devices and conferencing to ensure proper creation of the audio/video record and system operation.
3. JAVS Built PCs/Recorders. JAVS will inspect the system logs for errors, update the Windows Operating System, hardware drivers, specific programs related to the capture and playback of the recording, and will provide revisions to the installed JAVS software and to the JAVS recorders. A test of the JAVS supplied CD/DVD drive will be performed to ensure Customer can create off-line back-up recordings. Hardware or operating system malfunctions of the client-provided PC and/or client-managed network will be the responsibility of the Customer. In addition, JAVS will repair JAVS built PCs/recorders as long as parts are available. If JAVS built PCs/recorders are not repairable, Customer will be responsible for a percentage of the replacement based on the age of the unit as follows: 0% for 0 to 12 months, 25% for 13 to 24 months, 50% for 25 to 36 months, 75% for 37 to 48 months, and 100% for 49 months and older.
4. JAVS AutoLog Software. A test of the JAVS software will be performed to ensure proper operation including scheduling, interfacing with the A/V mixer/switcher to activate system modes, starting and stopping of recordings/sessions, publishing, and playback of the recording.
5. Help Desk Support. In the event of a System(s) malfunction or questions about system operation, the Customer is encouraged to first contact the JAVS help desk by phone at 877-528-7457 or via email at helpdesk@javs.com Monday-Friday 7:00am to 6:00pm EST. Outside of regular business hours, Customer may contact the local Safeguard Technician. Calls after 5:00pm local time will normally go to voicemail

and be addressed at the beginning of the next business day. JAVS trained help desk staff provides immediate troubleshooting, training and diagnostics on common issues that can be resolved quickly. We also provide on-line PC support and training through your Internet connection. If the issue requires an on-site technician for repair, our help desk will gather the necessary contact information including: Contact's name, phone number, city, room affected and a detailed description of the issue. The contact information is required for JAVS help desk to log/track the issue properly, assign a priority level and dispatch the appropriate technician for that location. Each of our technicians is equipped to train and customize the System(s) to your needs.

6. **Response Times.** In the event that an on-site repair is required to address a reported issue, a JAVS Safeguard Technician will schedule a visit during regular business hours. The response time is conditional to Customer's approved room and equipment availability and the severity of the issue, which is measured in four priority levels: Urgent, High, Normal and Supportive. Any variation from the timeframes referenced below will be discussed and mutually agreed upon by Customer and JAVS. For clarification, the priority levels are described in the table below:

Priority Level	Example	Initial Response*	On-Site Response**
Urgent	Non-Recording System; inability to record audio; inability to record judge, witness or attorney microphone(s)	1 Business Hour	2 Business Days
High	Faulty monitor, camera, microphone (other than Urgent Level examples), or system mode not critical to recording; publishing; SDR; video conferencing	2 Business Hours	3 Business Days
Normal	System adjustments to microphone or PA levels, camera views and user settings; CaseViewer software	4 Business Hours	5 Business Days
Supportive	Operational training or minor/preferred hardware or software user adjustments	8 Business Hours	Next scheduled maintenance or other higher level repair visit

*An "Initial Response" for the purposes of this Agreement is when a service ticket is opened and acknowledged by JAVS help desk or JAVS Safeguard Technician.

**An "On-Site Response" for the purposes of this Agreement is the time from when JAVS help desk or JAVS Safeguard Technician logs the ticket and when the JAVS Safeguard Technician arrives to Customer's agreed upon appointment for the initial on-site repair.

7. **On-Site Repair.** During the process of an on-site repair, the JAVS Safeguard Technician will attempt to repair the faulty equipment dependent upon parts and courtroom availability. If the equipment is not repairable in the field, either a loaner unit will be installed until the original equipment is repaired and reinstalled or a permanent exchange will be put into service. If the failed equipment does not affect an urgent priority level repair, then a loaner will not be required. If products or parts are no longer supported by the original equipment manufacturer and deemed non-repairable, Customer will be responsible for the purchase of a replacement product or part. If the failed equipment is listed on the obsolete list per Attachment B, then JAVS will provide a quote to upgrade the affected product or part.

8. **Modification of Operation.** Occasionally a change of usage, operation or enhancement of operation is desired by Customer. JAVS will provide a quote for the changes or enhancements. A requested change or upgrade that is authorized by Customer and approved by JAVS, will be performed in accordance with agreed specifications. Customer will purchase any additional hardware as may be required; the newly

purchased hardware will be covered by a one-year warranty period commencing with the completion of installation, but will not extend the existing Agreement. Following the warranty period, Customer will have the option to add the new hardware to the Agreement at a prorated rate if applicable. **Maintenance Fee for following contract period will be calculated to include upgraded or added equipment, if applicable.**

9. Updates. At its option, JAVS may offer to include certain updates to the System(s) as part of this Agreement. The inclusion of updates, if any, will be for software revisions and minor hardware. This will assist JAVS to maintain a consistent level of engineering in every system and will promote compatibility among the System(s). Updates will not include major equipment changes, such as microphones, recorders, cameras, hard drives, or operating system. Updates will be performed with Customer's approval.

JAVS will provide minor revision software updates for AutoLog™ and other JAVS branded software. Software updates must be compatible with the hardware installed and with the permission of the Customer.
